

Cancer Treatment Centers of America® and you

Dartmouth alumni speak about their experience at CTCA.

The Fellowship Program provides an development program that accelerates managerial growth in individuals with high potential. Over the course of two years, Management Fellows undertake rotational projects in a variety of business challenges and high-level organization dynamics. Rotations and projects are mutually designed by Fellows and leaders within the organization to provide exposure to all facets of the business including, but not limited to: finance, marketing, new business development, strategy, hospital operations and talent development.

With the freedom to freely rotate among any of CTCA's hospitals, business entities, departments, and executive sponsors, the Management Fellowship presents recent undergrads an experience most Dartmouth students are familiar with – abundant choices and the encouragement to explore and find their niche. – Jude Chiy '10

One way our organization has grown is through grooming future executives through our management fellowship. In fact, our first management fellow is now the President and CEO of our Tulsa hospital. The growth opportunities here are unparalleled –Steve Kroll '81

I am mentored by a national board member and I have also spent 4 months working side by side with the President and CEO of the organization. How many recent graduates can say that?! –Molly Parker '10
