

# Impact 2013

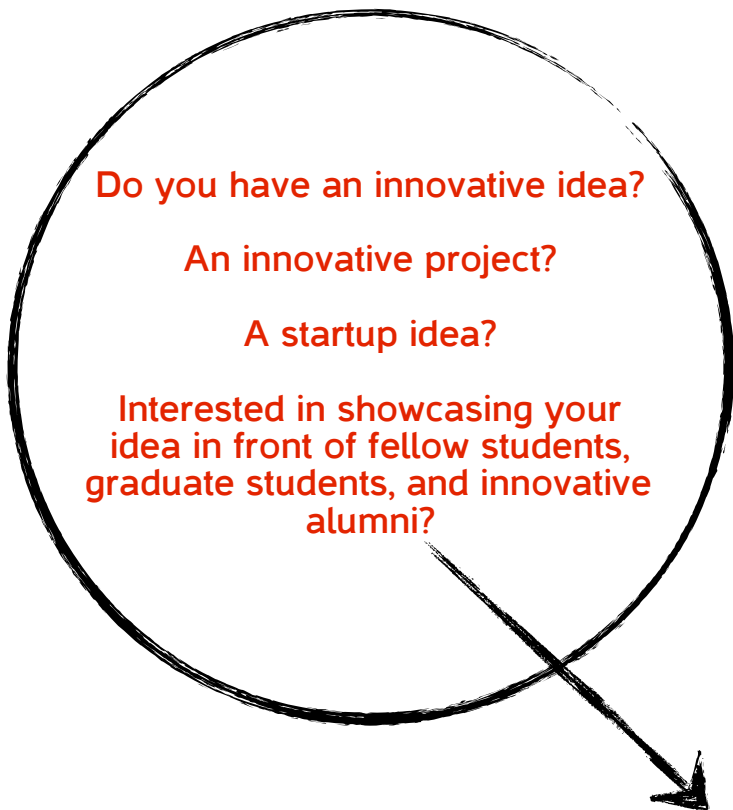

Empowering Innovation

March 2nd at 12:30  
The Hanover Inn  
Dartmouth College

There are so many great ideas at Dartmouth, and Mitosis Inc. would like to put this inspiring intellectual capital on display.

At **Impact 2013**, the top researchers, innovators, and entrepreneurs from Dartmouth College, the Tuck School of Business, the Thayer School of Engineering, and the Geisel School of Medicine will come together for the first time to collectively showcase their novel ideas and projects. We hope the event will help mold the innovative environment necessary for ideas to prosper.

# About Us

Mitosis Inc. is Dartmouth's first undergraduate venture accelerator program. We work with various groups on campus to create the structured process necessary to help venture ideas access key resources and reach success. Thus far our ventures have received hundreds of thousands of dollars in seed capital, accessed top talent for iOS development, and presented at our First Annual Demo Day this past Fall. Demo Day was a huge success, with over 200 investors, students, and professors from places such as ABS Ventures, Battery Ventures, Google Ventures, upon others, in attendance.
