

# Interested in Investment Banking or Private Equity?

## Enroll in our Financial Modeling Certification (“FMC”) Program to stand out amongst your peers

As a result of an increasing demand for financial modeling skills, Adventis CG created the FMC Program to provide hands-on financial modeling training. Our FMC Program connects students with former investment bankers and private equity professionals, bringing real-world expertise beyond the classroom. Students who have earned our financial modeling certifications have found great success in not only mastering skills, but also securing internships, and making long-term connections.

**Date:** October 3 & 4, 2015
