

Palaeontologia Electronica Vol. 13, No. 2
29 July 2010

Commentary

[The State of Paleontology in New Zealand](#) ([print](#)) 13.2.4A
James S. Crampton and Roger A. Cooper

Research Articles

[Discrimination of Fenestrate Bryozoan Genera in Morphospace](#) ([print](#)) 13.2.7A
Steven J. Hageman and Frank K. McKinney

[The Digital *Plateosaurus* I: Body Mass, Mass Distribution, and Posture Assessed by Using CAD and CAE on a Digitally Mounted Complete Skeleton](#) ([print](#)) 13.2.8A
Heinrich Mallison

[Microconchid-Dominated Hardground Association from the Late Pridoli \(Silurian\) of Saaremaa, Estonia](#) ([print](#)) 13.2.9A
Olev Vinn and Mark A. Wilson

[Moncharmontzeiana: New Name for *Pytine* Moncharmont Zei and Sgarella, 1978 Non Fortey, 1975](#) ([print](#)) 13.2.10A
R. Timothy Patterson

[Benthic Foraminifera from the Diatomaceous Mud Belt Off Namibia: Characteristic Species for Sever Anoxia](#) ([print](#)) 13.2.11A
Carola Leiter and Alexander V. Altenbach

[A Guide to Late Albian-Cenomanian \(Cretaceous\) Foraminifera from the Queen Charlotte Islands, British Columbia, Canada](#) ([print](#)) 13.2.12A
R. Timothy Patterson, James W. Haggart, and Andrew P. Dalby

[Seasonal Environmental and Chemical Impact on Thecamoebian Community Composition in an Oil Sands Reclamation Wetland in Northern Alberta](#) ([print](#)) 13.2.13A
Lisa A. Neville, Francine M.G. McCarthy, and Michael D. MacKinnon

[Ecology of Paleocene-Eocene Vegetation at Kakahu, South Canterbury, New Zealand](#) ([print](#)) 13.2.14A
Mike Pole

[New Interpretation of the Postcranial Skeleton and Overall Body Shape of the Placodont *Cyamodus Hildegardis* Peyer, 1931 \(Reptilia, Sauropterygia\) \(print\)](#) 13.2.15A

Torsten M. Scheyer

BOOK REVIEWS

[Smithsonian's Prehistoric Pals Series \(print\)](#) 13.2.3R

Dawn Bentley, Ben Nussbaum, and G.B. McIntosh

Reviewed by Elisabeth Marcot, Jonathan Marcot, and Karen Sears

Why publish in *PE*?

1. You can publish full colour figures, videos and three-D animations with no charge
2. *PE* is *truly* open-access, with no charge to authors or to readers, and it is fully electronic. *PE* is read all over the world; even by colleagues and students who lack adequate libraries or funding
3. *PE* is listed in ISI and is rapidly growing in readership and impact factor
4. *PE* meets the requirements for publication of new zoological and botanical taxa
5. *PE* is supported by the Palaeontological Association, the Paleontological Society, and the Society of Vertebrate Paleontology
