

## **Staff Hydrogeologist (Denver, CO) -**

Leonard Rice Engineers, Inc. is a 41 year old water consulting-engineering firm, providing services and expertise related to planning, management and development of water resources. We are currently seeking a full time geological engineer or hydrogeologist with 1 to 3 years of experience.

### **Job Description:**

The job will consist of assisting project managers with various consulting jobs. Responsibilities include spreadsheet analyses, preparing written descriptions of work tasks, hydrogeologic interpretations, creating graphs, and other visual materials to support projects and reports as assigned.

### **Requirements:**

The ideal candidate will have a BS or MS in the geological sciences and have additional knowledge of MODFlow and GIS. Must have experience with Microsoft Office software, and basic skills in word processing, and spreadsheets. The candidate must be professional, dedicated to continual learning and be highly motivated. They must also have strong attention to detail while understanding the big picture, be capable of managing time effectively, and have strong communication skills.

### **Benefits:**

We offer a competitive salary and benefits program that includes medical, dental, vision, life, flexible spending account, long and short term disability, long term care, and 401(k) plan.

If you meet the requirements above and are interested in this position, please submit your cover letter and resume to [employment@lrewater.com](mailto:employment@lrewater.com). Leonard Rice Engineers is an Equal Opportunity Employer.
