Software Engineer

Location: Andover, MA

Job Code: SESJ0415

Description

The Software Engineer will be responsible for general software development for our Robotics products. This person needs to have strong technical skills in software engineering. The position will be a hands-on one with the individual capable of creative and systematic product development with minimum supervision. The job requires the individual to be a team player with the ability to function well in a challenging and fast paced environment. Must be enthusiastic, positive, even tempered and have strong skills in areas of dependability, interpersonal relationships, flexibility and maturity.

Primary Responsibilities

- Able to work on sizeable individual efforts as well as on teams using agile methodologies.
- Develop prototypes, proofs of concept in addition to production-quality solutions.
- Ensure efficient performance and scalability of solutions.
- Demonstrate a passion for software development, software craftsmanship, and test-driven development.
- Contribute to design, testing and documentation.
- Maintains professional and technical knowledge by attending educational workshops, reviewing professional publications, establishing personal networks, and participating in professional societies.
