Senior Software Engineer

Location: Andover, MA

Job Code: SSESJ

Description

The Senior Software Engineer will be responsible for major software modules for our Robotics products. This person needs to have strong architectural and technical skills in software engineering. The position will be a hands-on one with the individual capable of creative and systematic product development with minimum supervision. The job requires the individual to be a team player with the ability to function well in a challenging and fast paced environment. Must be enthusiastic, positive, even tempered and have strong skills in areas of dependability, interpersonal relationships, flexibility and maturity.

Primary Responsibilities

- Able to work on sizeable individual efforts as well as on teams using agile methodologies.
- Develop prototypes, proofs of concept in addition to production-quality solutions.
- Ensure efficient performance and scalability of solutions.
- Demonstrate a passion for software development, software craftsmanship, and test-driven development.
- Understanding of an FDA design control environment.
- Contribute to design, testing and documentation.
- Develop software tools to support product manufacturing and service.
- Supports manufacturing, internal testing, and external customers when presented with quality issues. Prioritizes work to identify the root cause and create a corrective plan that ensures timely resolution of issues.
