Software Quality Assurance Engineer

Location: Andover, MA

Job Code: SQQNJ1214

Description

The Software Quality Assurance Engineer will be responsible for developing and executing test protocols/procedures for software in our robotic products. The position will be a hands-on one with the individual capable of creative and systematic test development with minimum supervision. The job requires the individual to be a team player with the ability to function well in a challenging and fast paced environment. Must be enthusiastic, positive, even tempered and have strong skills in areas of dependability, interpersonal relationships, flexibility and maturity.

Primary Responsibilities

- Create test protocols or procedures to verify software design requirements and ensure traceability from requirements.
- Execute software test protocols/procedures.
- Familiar with entire software development life cycle.
- Support Production / Manufacturing, internal testing and external customers when presented with quality / support issues. Conduct troubleshooting investigations to reproduce issues and support root cause identification.
- Work with other engineers and technicians to plan and conduct the testing tasks as part of the overall project.

Qualifications

- Bachelor's Degree with 3-5 years of software testing experience
