

Second College Grant Research Symposium

OCCOM COMMONS, McLaughlin Cluster
Thursday, April 20, 2017, 1:00-4:00 PM

Learn about exciting research projects currently underway at Dartmouth's Second College Grant, a 27,000 acre forest in northern New Hampshire

- Many opportunities for student research
- Potential for paid internships
- Moderated by Professor Rich Howarth, Dartmouth Environmental Studies Program

Presenters include

- Kevin Evans, Dartmouth College, *Overview of the Second College Grant*
- Anthony D'Amato, Rubenstein School of Environment and Natural Resources, University of Vermont, *Adaptive Silviculture for Climate Change*
- David Lutz, Dartmouth College, *Sensor Technologies for Forest Systems*
- Mark Green, Hubbard Brook Experimental Forest/Plymouth State University, *Watershed Hydrology*
- Dianne Timmins, NH Fish & Game Dept., *Stream Connectivity and Brook Trout Movement*
- Keith Fritschie, Dartmouth College, *Brook Trout Spawning and Temperature Networks*
- Peter Pekins, University of New Hampshire, *Tracking Moose Movement and Mortality Through Remote Sensing*
- Alexej Siren, University of Massachusetts, *Habitat Use by Northern Forest Mammals*
- Riley Patry, Dartmouth College, *Wood Turtle Habitat Utilization*
